

## 2019 PRICELIST €

#### SUNBRELLA CUSHION FABRICS

QUICK PICK: NATTE DARK TAUPE – NATTE CARBON BEIGE  
CAT. A: SOLIDS & STRIPES – SOLIDS PREMIUM – BENGALI – CHECKS – DUPIONE – HERITAGE – NATTE – SLING LOGAN/AUGUSTINE  
CAT. B (+ PRICE SUPPLEMENT): CHARTRES – DEAUVE – HEXAGON – KANOKO – LOPI – MARBLE – MOSAIC – PALAZZO – ROBBEN – SAVANE – SLING SAILING – TUNDRA

LEAD TIME FOR ALL SUNBRELLA FABRICS: 2 – 4 WEEKS

---

## ICONS

**TOTAL VOLUME**  
THE TOTAL VOLUME OF THE FURNITURE INDICATES THE VOLUME OF ALL PACKED PARTS OF A COMPLETE PRODUCT  
FOR MORE DETAILED INFORMATION CHECK THE PRODUCT PACKAGING DATA SHEET

**TOTAL WEIGHT**  
THE TOTAL WEIGHT OF THE FURNITURE INDICATES THE WEIGHT OF ALL PACKED PARTS OF A COMPLETE PRODUCT  
FOR MORE DETAILED INFORMATION CHECK THE PRODUCT PACKAGING DATA SHEET

ALL DIMENSIONS ARE IN CM – ALL WEIGHTS ARE IN KGS – ALL VOLUMES ARE IN M3

## SPECIAL FEATURES:

**ITEM WITH ADJUSTABLE FEET**  
THIS ICON IS USED FOR FURNITURE EQUIPED WITH ADJUSTABLE FEET, SO A STABILIZED AND LEVELED INSTALLATION OF THE ITEM IS POSSIBLE ON ALMOST ANY SURFACE

**ITEM WITH WHEELS**  
THIS ICON IS USED FOR FURNITURE EQUIPED WITH 2 OR MORE WHEELS FOR EASY MOVING

# CUSHIONS LOUNGE COLLECTION

## WHEN TO USE THE EXTRA LARGE CUSHIONS FOR THE POLTRONA & BANCA LOUNGE

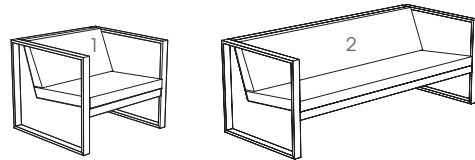

DIFFERENT SIZED CUSHIONS ARE AVAILABLE FOR THE POLTRONA LOUNGE AND BANCA LOUNGE. THE REGULAR SIZE IS TO BE USED IN THE REGULAR SETTING WITH ARMREST. THE XL AND XXL CUSHIONS EXTEND OVER THE CONNECTOR OR THE FRAME OF THE ESQUINA LOUNGE (SEE PICTURE BELOW). THE XL CUSHIONS ARE TO BE USED IN CASE OF A MODULAR COMBINATION OF ONE POLTRONA LOUNGE OR BANCA LOUNGE WITH A CONNECTOR OR ESQUINA LOUNGE. THE XXL POLTRONA LOUNGE AND BANCA LOUNGE CUSHION IS TO BE USED IF THE BANCA LOUNGE SEAT IS EXTENDED ON BOTH SIDES BY A CONNECTOR OR ESQUINA LOUNGE.

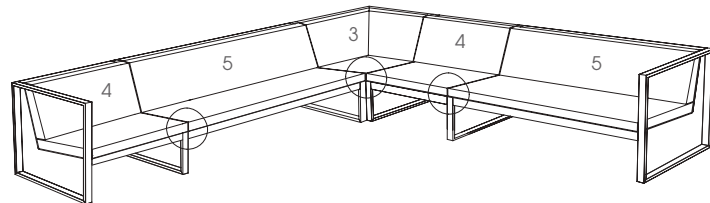

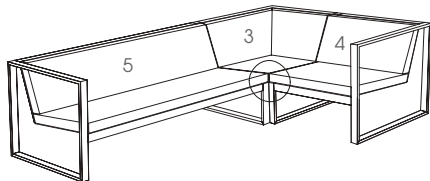

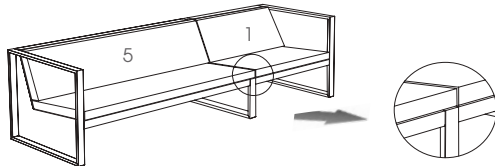

-  CUSHION POLTRONA LOUNGE - REGULAR SIZE (79 cm)
-  CUSHION POLTRONA LOUNGE - XL (+6 cm)
-  CUSHION POLTRONA LOUNGE - XXL (+12 cm)

-  CUSHION BANCA LOUNGE - REGULAR SIZE (188 cm)
-  CUSHION BANCA LOUNGE - XL (+6 cm)
-  CUSHION BANCA LOUNGE - XXL (+12 cm)

# MATERIALS

## STAINLESS STEEL

Stainless steel is commonly known as rust-free steel (RFS) or Inox. This is a ferrous alloy that increases the corrosion resistance of a substance by the addition of chrome and nickel. The principle is based on protecting the surface area by means of chrome-oxide and nickel-oxide molecules. These molecules are much larger than the underlying iron molecules, which prevents the latter from binding with oxygen and forming iron oxides – better known as rust.

In order to obtain a chrome-oxide and nickel-oxide surface that is of a high grade purity and homogeneity, thus achieving optimal corrosion resistance, the frames are etched and subjected to a passivating process as a standard treatment. Chlorine is RFS' greatest enemy and can cause a type of corrosion that is known as "pitting". For that reason, it is recommended that in locations near the seacoast - since sea salt is sodium chloride - the metal be given a surface made as smooth as possible in order to increase its resistance to corrosion even further. The smoother the surface, the less porous it is. The lower the porosity, the lower the possibility of dirt deposits accumulating on the metal surface, and thus the lower the risk of corrosion. For that reason, we recommend the optional electro-polishing treatment of the item's frame if it is to be used in a corrosive environment.

## BATYLINE®

Batyline® is a woven polyester fibre protected by a PVC coating. The fibres are then bundled together in order to obtain an exceptionally solid fibrous substance that is permanent, resistant to stretching, and immune to cracking.

Batyline® does not deform or create pockets: Précontraint® Ferrari® technology, basis of a unique process, ensures the fabrics outstanding dimensional stability. The most important feature is its pliancy and optimal seating comfort. Batyline® textiles offer excellent resistance to mould and mildew and benefit from surface treatment against UV degradation. This surface treatment also offers exceptional resistance to dirt.

Batyline® fabrics are eco-designed, ensuring optimum usage of resources and favouring safety, environmental impact reduction and incorporation of renewable raw materials. Its production facilities (in France and Switzerland) are ISO 14 001 certified and use green electricity and renewable energy sources.

All Batyline® textiles are certified Oeko-Tex. This label guarantees the absence of undesirable substances for you and those close to you.

## POWDER COATING

Powder coating is a type of coating that is applied as a free-flowing, dry powder. The main difference between a conventional liquid paint and a powder coating is that the powder coating does not require a solvent to keep the binder and filler parts in a liquid suspension form. The coating is typically applied electrostatically and is then cured under heat to allow it to flow and form a "skin". Because powder coating does not have a liquid carrier, it can produce thicker coatings than conventional liquid coatings without running or sagging, and powder coating produces minimal appearance differences between horizontally coated surfaces and vertically coated surfaces. The result of choosing a powder coated product is that it will have the most attractive, durable, high-quality finish available.

The powder may be a thermoplastic or a thermoset polymer. It is usually used to create a hard finish that is tougher than conventional paint. Powder coating is mainly used for coating of metals, such as household appliances and automobile and bicycle parts. The benefits of powder coating for consumers are simple: powder coating will make your purchase look better and last longer – not to mention its reduced environmental footprint!

## TEAK

Teak wood is produced by the Tectona Grandis, a tree that under favourable conditions can attain a height of up to 45 m, with a trunk diameter up to 2.4 meters. The wood's renowned durability is due to its high content of natural oils.

The limited absorption of moisture protects the wood from warping and thus gives the wood its enormous stability. In addition, the wood is highly resistant to attacks by pests. It is because of these qualities, as well as its exceptionally attractive hue and structure, that teak has deservedly received the title of "the noblest of all wood types".

In view of its high resistance, teakwood does not require additional protective measures. Nonetheless, a treatment to render the wood less sensitive to stains, or to keep the original colour of the wood, may be desired. Untreated wood, exposed to water and UV rays, will oxidise and take on a silver-grey sheen. It is simply a question of personal taste whether or not an individual wishes to allow the teak to "weather" to a silver-grey colour, or would rather maintain the original golden-brown colour of the wood.

# MATERIALS

## GLASS

Its resistance to staining and scratching makes glass a highly suitable material for tabletops in outdoor furniture. The glass used in the FueraDentro collection is available in white, cendre (Café latte) and black versions. They have a matt acid-washed finish, which is very scratch- and fingerprint resistant. Only the E-Volved table is available with extra clear transparent glass.

Glass surfaces may be cleaned with classic glass cleaners.

In the case of stubborn dirt and calcium deposits, "Glass Heavy Duty Cleaner" may be used. Use only for serious contamination. Avoid contact with skin and eyes. Extra protection is required.

## CERAMIC

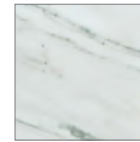

The FueraDentro ceramic table tops consist of two 5mm slabs, which are glued together with a polyurethane / fibre glass resin. These slabs are made in porcelain stoneware and produced with an innovative technology, which compacts the material and then fires it in an electric kiln at temperatures over approx. 1220°C. This process is designed to ensure product uniformity, in addition to affording a modern appearance.

FueraDentro ceramic table tops are available in black, white and cendre colours, and will not fade over time.

Characteristics of ceramic which make it ideal for outdoor use are:

- it can be easily cleaned without affecting its surface characteristics.
- highly scratchproof and resistant to deep abrasion.
- a high breaking threshold.
- it is frost resistant and suitable for any weather condition.
- does not contain organic material therefore it is resistant to fire and high temperatures.
- perfectly suitable for food substances since it does not release elements in solution. It does not allow the formation of mould, bacteria and fungi.
- a totally natural product. It does not release any elements into the environment and can be easily milled and recycled in other manufacturing processes.
- does not contain organic pigments and is resistant to UV rays. Even if subjected to severe climate changes, the colours remain stable.

## BELGIAN BLUESTONE

Belgian bluestone or "Little Granite" is a limestone with a more or less pronounced natural blue/grey colour, which is characterized by the presence of a large number of fossilized crinoids. This type of bluestone is only quarried in Belgium.

A beautiful limestone planking with a cool dark blue-gray colour palette with numerous inclusions. The inclusions are fossils of ancient sea life. Belgian Bluestone has humble origins and was used primarily as a ballast for ships and as road paving material. It became popular as an interior flooring material in the 19th century and can be found in luxury homes, exclusive hotels, and high-end retail stores throughout Europe. Precision cut with sawn sides and backs, it offers a consistently square piece. The colour consistency from piece to piece is good. It is a dense, durable material that is suitable for many applications.

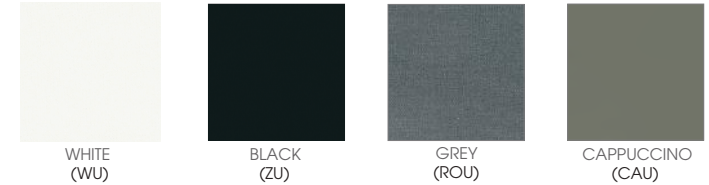

- It develops a natural patina: use: outdoors, changes due to the action of rain and UV-rays to its original pale blue-grey colour use : indoors in the course of time, it develops a deeper colour
- Bluestone is susceptible to products and scratches
- Belgian bluestone can often contain a number of white veins, black lines, spots and fossils.
- Depending on the finishing, the stone has a different look "White veins" are water veins, formed by water, 100% specific to bluestone and are not cracks as people often assume.  
Fossils and colour differences: stone is a natural material formed by different perfectly petrified fossils. So it is normal to find nests of crustaceans in the stone. In other words, even in one sheet of stone clear differences in colour can be observed.

# FABRICS

## TEMPOTEST®

Tempotest® is a fabric particularly suitable for outdoor use. Tempotest® is woven from mass-coloured acrylic fibre; your security for optimal water- and UV resistance, plus years of optimal comfort. General information and maintenance.

Most stains on the material can be cleaned with mild soap and water. Simply remove dirt by scrubbing with water (under 40°C) and natural soap. Rinse liberally with clean water to remove all the soap. Removable covers can be washed at 40°C in the washing machine. Do not iron or spin dry. To prevent creasing replace the covers while still damp, and dry in the open air. Store the material in a dry, well-ventilated area in winter.

## SUNBRELLA®

Sunbrella fabrics give you the sophisticated style you want with the protection you need and are made to last for many seasons outdoors without fading; breathable and mold-resistant, they prevent condensation from heat and humidity. An anti-stain treatment safeguards your Sunbrella fabrics, which are machine-washable and provide effective protection against UV rays. The Sunbrella colors withstand sunlight and harsh weather conditions.

- QUICK PICK:** Natte dark taupe - Natte carbon beige  
**CAT. A:** Solids & Stripes - Solids Premium - Bengali - Checks - Dupione - Heritage  
 Natte - Sling Logan/Augustine  
**CAT. B:** Chartres - Deauve - Hexagon - Kanoko - Lopi - Marble - Mosaic - Palazzo  
 (+ price supplement): Robben - Savane - Sling Sailing - Tundra

Lead time for all Sunbrella fabrics: 2 - 4 weeks

## STAMSKIN®

Stamskin® is a fabric particularly suitable for outdoor use. With its unique elasticity and suppleness, this artificial leather offers outstanding seating comfort. General information and maintenance.

Stamskin®, produced by Serge Ferrari, benefits from a manufacturing technique which gives it incomparable flexibility. Its elegant appearance and pleasant feel are particularly appreciated. Comfortable, easy to care for and weather resistant, Stamskin® is known for its undeniable advantages.

Its strength, durability and easy care make Stamskin® a fabric particularly suitable for outdoor use. With its unique elasticity and suppleness, this synthetic leather offers outstanding seating comfort. The nature of its base-cloth and the composition of Stamskin Top® offers longevity. This material has an excellent resistance to ultraviolet radiation (UV) and is treated to resist micro-organism and mould. Stamskin Top® is classified flame retardant in accordance with current European fire safety standard.

STAMSKIN® WITHOUT BUTTONS

STAMSKIN® WITH BUTTONS

## STAMOID®

Stamoid is a vinyl coated woven polyester, completely waterproof, easily cleanable, cool to sit under, and folds and stores well. The high tenacity weave holds its shape and does not show humidity sagging problems common to lower marine grade fabrics. The vinyl sides are very easy to clean with a sponge and mild detergent.

## ZERO LANDFILL

For over 30 years, Sunbrella® has recycled its industrial wastes such as yarn and packaging. Today, every Sunbrella® manufacturing facility around the globe sends absolutely no waste to the landfill.

## SKIN PROTECTION

The Skin Cancer Foundation recommends Sunbrella® fabrics in shading products as an aid in the prevention of sun-induced damage to the skin as a part of a complete sun protection regimen, including regular use of sunscreen.

## GREENGUARD CERTIFIED

Sunbrella® upholstery fabric has achieved GREENGUARD GOLD Certification. Sunbrella® upholstery fabrics are certified by GREENGUARD as contributing to healthy indoor air by being a very low emitting interior product.

## OEKO-TEX LABEL

A quality that meets human-ecological requirements. Awarded with the OEKO-TEX label (class II – products with direct contact to the skin), Sunbrella® fabrics are made without any identified harmful substance that could be a danger to health, skin and the environment.

LANDFILL  
FREE

## ZERO LANDFILL

For over 30 years, Sunbrella® has recycled its industrial wastes such as yarn and packaging. Today, every Sunbrella® manufacturing facility around the globe sends absolutely no waste to the landfill.

## SKIN PROTECTION

The Skin Cancer Foundation recommends Sunbrella® fabrics in shading products as an aid in the prevention of sun-induced damage to the skin as a part of a complete sun protection regimen, including regular use of sunscreen.

## GREENGUARD CERTIFIED\*

Sunbrella® upholstery fabric has achieved GREENGUARD GOLD Certification. Sunbrella® upholstery fabrics are certified by GREENGUARD as contributing to healthy indoor air by being a very low emitting interior product.

## OEKO-TEX LABEL\*

A quality that meets human-ecological requirements. Awarded with the OEKO-TEX label (class II – products with direct contact to the skin), Sunbrella® fabrics are made without any identified harmful substance that could be a danger to health, skin and the environment.
